

Kencor's President and CEO, Muthu Krishnan, Selected as Panelist at the 2nd Annual Patient Experience & Engagement Summit

September 25, 2020 - For immediate release
Sunnyvale, California

Kencor's President and CEO Muthu Krishnan has been selected to be a panelist on Day 2 of the 2nd Annual Patient Experience and Engagement Summit on October 7th at 14:45. The topic will be "Craft the New Normal: What Will Never be the Same Again in the Healthcare Experience?"

The conference is from October 6-7, 2020 and Kencor will be a Network Partner and Presenter. As part of the discussion there will be central themes of COVID-19 as a function of patient experience innovation, high quality care delivery, the future of telehealth and patient experience, leadership, and advances in telemedicine.

Each panelist has a compelling piece to add to the conversation:

1. What should healthcare providers do in order to get patient volumes back and find new patients?
2. What advice do you have for other CXOs as they navigate the pandemic
3. Balancing patient and caregiver experience during this time – what you have learned through this experience that you want other C-suite leaders to know?
4. Emergence of new care models and how they should be integrated in the new normal operating environment?
5. Anticipate coming changes to the future of healthcare with an optimized reputation management and communication strategy

Come and delve into the minds of global px innovators, disruptors, and future technologists! We hope you can join us on October 6-7.

2nd Annual Patient Experience & Engagement Summit

6 - 7 October 2020 | VIRTUAL EVENT

About Kencor Health

When it comes to patient engagement, the promise of Artificial Intelligence is to revolutionize the experience of care by anticipating the patient's needs, providing faster and more effective outcomes, and as a result, healthier and happier people. Kencor engages with people in a highly contextual and appropriate manner, providing tailored care based on the situation, and in real-time. Kencor's "SAMi™" bot, using AI knows precisely how to interact with people and knows how and when to engage, based on the time of day, routines, and also with the expert and familiar advice of healthcare teams and physicians.
